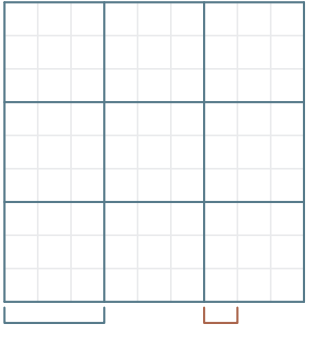
(a) Auxiliary refinement

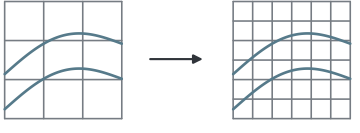


$U, a$ fixed

$h_n \longrightarrow 0$

(b) Classical continuum limit

Same smooth background



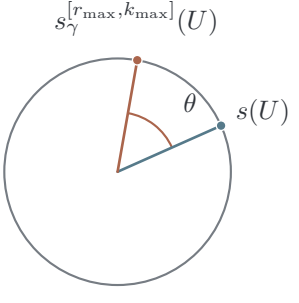
$j_{\mathrm{L}}^{\mathrm{finite}} = O(a^2)$

$j_{\mathrm{L}}^{\mathrm{exact}} = O(a^6)$

$A, \ell_\mu$ fixed

$a \longrightarrow 0$

(c) Polynomial accuracy



Same determinant line

$a, V, \gamma_U$ fixed

$r_{\max}, k_{\max} \longrightarrow \infty$
